# Agenda

- **Concepts of story mapping**
- **Story mapping techniques**
- **Steps involved in building a story map**
- **Best Practice standards**
- **Q & A**

# What is story mapping?

- A collaborative practice that guides teams in defining work.
- Visualizes the journey a customer takes with a product.
- Aligns team understanding and prioritizes features.

# Key Benefits of Story Mapping

- Provides a user-centric approach to product development.
- Facilitates better release planning and prioritization.
- Enhances communication among stakeholders.

---

# Components of a story map

---

- It is a now map, not a later map
- Activities form the backbone of a story map
- User tasks are the basic building blocks of a story map
- Slice out tasks to achieve a common outcome
- Maps are organized left to right for a narrative flow

# Story Mapping begins with .....

User Interviews:  
Gathering user experiences and needs.

Persona Development:  
Creating detailed user profiles.

User Journey Identification:  
Mapping out user steps and interactions.

# Six Steps to create a story map

## Frame

Big story What , who,  
why?

## Map

the user activities.

## Explore

Arrange user activities  
into tasks. Fill the map

## Structure

the map by organizing  
stories and tasks.

## Slice out viable releases

Name target outcome  
for each release

## Slice out development strategy

Opening game, mid  
game, end game

# Organize Your Story Map

Use

Use horizontal swim lanes to represent user tasks or activities.

Prioritize

Prioritize stories vertically within swimlanes.

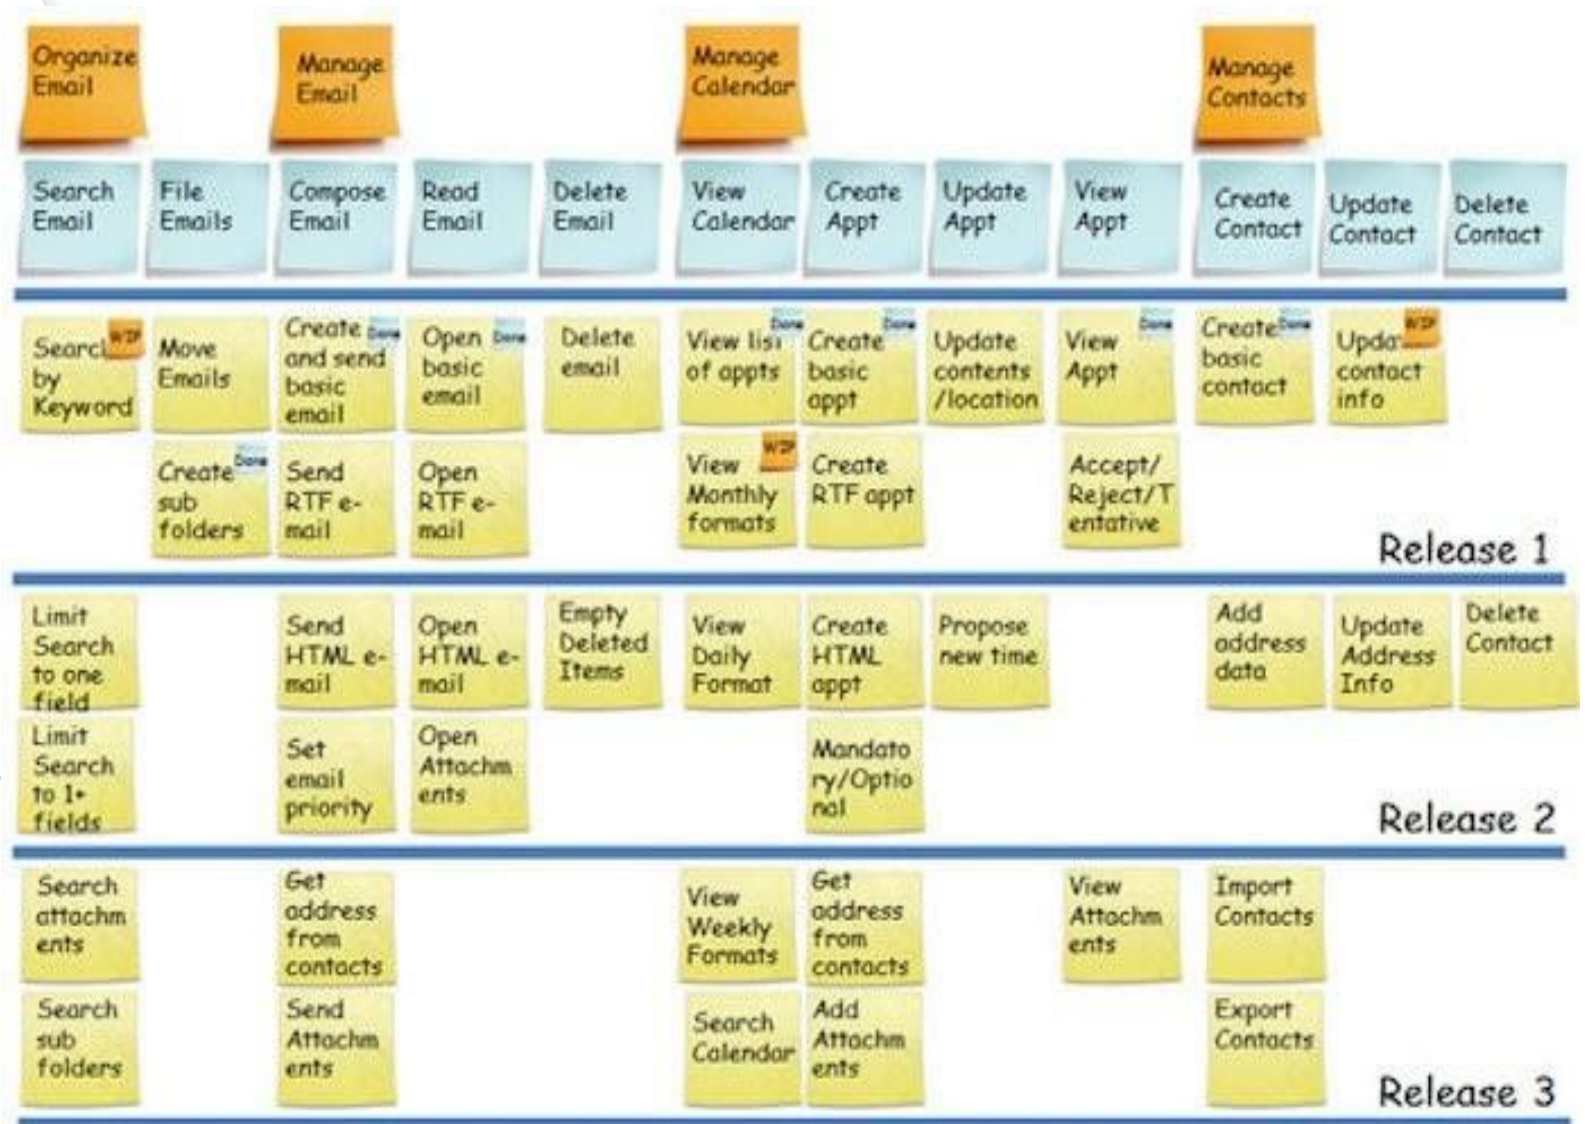

Group

Group related stories to form epics or themes.

# Example of a story map

# Best practices for story mapping

User Goals and Team Involvement

Structure and Collaboration

Prioritization and Accessibility

Communication and Validation

# How and what to use ?

- Conduct collaborative Story Mapping Sessions
- Involve cross-functional team members.
- Encourage open discussion and feedback.
- Use physical or digital tools to facilitate collaboration.
- Physical boards with sticky notes.
- Digital tools like JIRA, Trello, Mural or Miro for remote teams, and many more....

**Tell a story, not merely script it!!!**
